Our Queensland Outback birding adventure explores the remote and scenic corners of Western Queensland and the Gulf Country where many of Australia’s most desirable and seldom-seen endemics await us.
This comprehensive tour targets all the region’s specialties in the unique and fascinating spinifex-dominated, stunted-Eucalyptus woodland, arid plains and savannah that covers much of this part of the continent. The birding is truly fantastic and we’ll be searching for a number of rare and little-known gems like Carpentarian and Kalkadoon Grasswrens, Masked, Long-tailed, Painted, Gouldian and Star Finches, Spinifex Pigeon, Spinifexbird, Grey and Black Falcons, Black-chested Buzzard, Red-backed Kingfisher, Ground Cuckooshrike, Purple-crowned Fairywren, Pictorella Mannikin, Rufous-crowned Emu-wren, Hall’s Babbler and Chestnut-breasted Quail-thrush to mention just a few of the possible highlights we hope to encounter on this specialist Australian birding tour.

Queensland Outback

Day 1: Arrival in Cairns. Today is set aside as an arrival day and this evening you’ll be met by your Rockjumper tour leader and enjoy a welcome dinner to discuss the exciting days ahead and what to expect, before settling in for the night.

Day 2: Cairns to Georgetown. This morning will be an early departure as we leave the city of Cairns behind for the time-being and begin the journey west towards Georgetown where we’ll spend the night.

We will undertake some opportunistic birding along the route, as well as stopping at various sites for certain key species and highlights along the way could include the spectacular Red-tailed Black Cockatoo, the unique Apostlebird (placed in the endemic Mud-nester family along with the strange White-winged Chough), the nomadic Cockatiel, the handsome Spotted Harrier, the magnificent Wedge-tailed Eagle, herds of dinousaurical Emus, White-throated and Brown-backed Honeyeaters and Brown Treecreeper.

Day 3: Georgetown to Karumba. We have a very exciting start this morning as we stake out a nearby dam that is usually an excellent place to see a number of beautiful and often-tricky finches. Here we hope to connect with Black-throated, Masked, Zebra and Double-barred Finches, as well as Pictorella and Chestnut-breasted Mannikins and if we are very lucky, perhaps even the very rare Gouldian and Plum-headed Finches.

Water-birds may include Black Bittern, Comb-crested Jacana, Green Pygmy Goose, Hardhead, the elegant Plumed Whistling Duck and Australasian Grebe.

The general birding in the surrounding woodland should also prove to be productive, especially in the early morning. Mixed flocks (bird parties) will be particularly evident and we hope to find a wide range of honeyeaters that could include Rufous-throated, Yellow-tinted, Banded, Bar-breasted, Grey-fronted, Black-chinned and Blue-faced. Other flock associated species we’ll be on the lookout for include the arid-country-specialist
Red-browed Pardalote, White-bellied Cuckooshrike, Brown Treecreeper and Paperbark Flycatcher. While searching for mixed species flocks, we’ll also be looking out for Varied Lorikeet, the gorgeous Pale-headed Rosella, the immaculate Diamond Dove and the superb and habitat-specific Spinifex Pigeon.

Thereafter we’ll drive west from Georgetown along the Savannah Way towards the small town of Karumba, looking out for species such as Sarus Crane, the endemic Brolga, Black-necked Stork, White-browed & Masked Woodswallows, Australian Pratincole and Emu, while the miniscule Weebill may also put in an appearance.

We can expect to arrive at our accommodation in Karumba in the early evening for a two-night stay.

Day 4: Karumba area. Today will be spent exploring the extensive mangroves and swampy grasslands around Karumba. The habitat here holds several very special mangrove specialties such as White-breasted and Mangrove Golden Whistlers, Broad-billed Flycatcher, Silvereye, the musical Mangrove Gerygone, Arafura and Mangrove Fantails, Red-headed Myzomela (Honeyeater), Mangrove Robin and Rufous-throated Honeyeater.

In adjacent grassland flats we can expect to encounter the stately Sarus Crane and Tawny Grassbird, and with some luck, the rare, beautiful and difficult-to-find Star Finch, which is more tied to fresh water environments around Karumba.

Along roadsides and in wetlands and open habitats between Karumba and Normanton we’ll search the grasslands and wetlands for Australian Bustard, flocks of Australian Pratincole, Raja Shelduck, Glossy Ibis and the possibility of an over-wintering Oriental Plover or two.

This evening we’ll try to locate one of the resident pairs of Barking Owl.

Day 5: Karumba to Burketown. After some early morning birding around Karumba, we'll set off again, this time heading for
Burketown, and of course we will stop to bird along the way.

A number of fabulous and rarely-seen avian specialities are available on this picturesque drive and we’ll be on the lookout for these species that could include the rare Black-breasted Buzzard, the lovely Red-backed Fairywren, Red-browed Pardalote, the erratic and elusive Ground Cuckoo-shrike and the nomadic and partially migratory Little Woodswallow. Other more widespread and regularly encountered species we can expect to see today include the stately Brolga and Sarus Cranes, Striated Pardalote (represented here by the black-headed *uropygialis* race that may be split in future) and White-throated Gerygone.

**Day 6: Burketown to Boodjamulla National Park.** Today’s drive through to the fabulous, bird-rich and extensive Boodjamulla National Park is not very long in distance but it will take around six hours to drive there due to the poor condition of the road. However, as always, we’ll break up the journey by means of regular birding stops. We are likely to encounter many of the species seen yesterday along with a few new ones, as well as further chances of the rare Black-breasted Buzzard and Ground Cuckoo-shrike, should we have missed them yesterday.

We can expect to arrive at Adel’s Grove, our destination for today and our base for the next two nights, sometime in the afternoon. If there is time this afternoon we will begin our search for the area’s many specialities that include the brilliant Purple-crowned Fairywren, the delicately-coloured Buff-sided Robin, Sandstone Shrikethrush, exquisite Long-tailed and Crimson Finches, Silver-crowned Friarbird, White-gaped Honeyeater, Pictorella Mannikin, Varied and Red-collared Lorikeets, Northern Fantail, Azure Kingfisher, Little Woodswallow and Paperbark Flycatcher.

**Day 7: Boodjamulla National Park.** We have the entire day to explore and bird around this prime location, looking for the aforementioned species, as well as other stellar species like Northern Rosella, Red-winged Parrot, Great Bowerbird, White-throated, Grey-fronted, Grey-headed, Black-chinned (represented here by the gorgeous Golden-backed *laetior* race), Brown and Yellow-tinted Honeyeaters, the superb Variegated
and Red-backed Fairywrens and White-bellied Cuckooshrike, as well as a distinct possibility of the very rare and elusive Grey Falcon.

**Day 8: Boodjamulla National Park to Mount Isa.** After a final morning’s birding in Boodjamulla National Park in search of any species we may still need, we’ll commence our journey to the somewhat more arid country around the mining town of Mount Isa, where we’ll be based for the next three nights. Specialties here include the extremely range-restricted and highly threatened Kalkadoon and Carpentarian Grasswrens, both of which will be major targets over the course of the next two days.

**Days 9 & 10: Mount Isa area.** We have two full days to find the area’s many specialties, top on the list being the difficult Kalkadoon and Carpentarian Grasswrens. Both species can be tough to find and may require a fair amount of effort and patience, as well as requiring very early starts in order to be in their unique and specific habitats before the heat of the day sets in.

The Kalkadoon Grasswren occurs in Spinifex-clad hillsides strewn with large boulders so some nimble-footedness will help here. With some luck we hope to see one singing from atop a boulder in the early morning. In this same area we also hope to find Grey-headed Honeyeater, Diamond Dove, the scarce and erratic Red-backed Kingfisher and Little Woodswallow.

Around midday we’ll head back to town for lunch, after which we will drive to a nearby lake to look for a range of aquatic and woodland birds like Wandering Whistling Duck, Glossy Ibis, Black-necked Stork, Intermediate Egret, Pacific Black Duck, Hardhead, Hoary-headed and Great Crested Grebes, Australian Pied and Great Cormorants, Australian Pelican, Maned Duck, Dusky Moorhen, Red-necked Avocet, Red-capped Plover, Black-tailed Treecreeper, Painted and Long-tailed Finches, Pictorella Mannikin, Bar-breasted Honeyeater, Varied Lorikeet, Little Friarbird and Rainbow Bee-eater.

In order to find the critically endangered Carpentarian Grasswren, we’ll need to drive north-west of Mount Isa to a well-known location for this increasingly difficult-to-find species. We’ll try in several locations along the route and with some good fortune we hope to find the Grey-headed Honeyeater by Jonathan Rossouw.
fortune will have found the bird before the day begins to warm up.

Other noteworthy species we may encounter in this area include Grey-headed Honeyeater, the stunning and scarce Painted Finch, Hooded Robin, Brown Falcon, Crested Pigeon, Little Corella, Cockatiel, the nomadic Budgerigar, Pallid Cuckoo, Sacred Kingfisher, Variegated Fairywren, Yellow-throated Miner, Crested Bellbird, Black-faced and Little Woodswallows, Australian Raven, Zebra Finch and the rare and often difficult-to-find Square-tailed Kite.

Mammal-wise, we’ll keep a lookout for the huge Red Kangaroo, the world’s largest kangaroo, the world’s seriously impressive Outback specialty!

**Day 11: Mount Isa to Winton.** We have the early morning to search for any species we may still be missing in the Mount Isa area. After what should have been a fantastic two-days birding around Mount Isa, we’ll continue our adventure by making our way towards Cloncurry.

We’ll make several stops along the way in search of species like Australian Ringneck (represented here by the local *macgillivrayi* race that is sometimes split as “Cloncurry Parrot”), Varied Lorikeet, Cockatiel, Little Corella, the ubiquitous but good-looking Galah, the unpredictable Budgerigar, the scarce and attractive Ground Cuckooshrike, Emu, Little Crow, Apostlebird, the striking Spotted Bowerbird, White-plumed Honeyeater and the rare Black Falcon.

We’ll settle into our accommodation in Winton in the evening for a two-night stay.

**Day 12: Winton area.** Today we’ll visit a nearby national park in search of several Spini fex and arid woodland specialties.

A number of Australia’s most special and difficult-to-access species occur in this uniquely Australian habitat that generally occurs in remote areas in the heart of the continent and we’ll have the entire day to search for a number of these highly sought-after species that reach the north-eastern-most part of their range in this corner of the country.

These include the strange Spini fex bird, Striated Grasswren (the *rowleyi* race...
that occurs here has been proposed as a split named Rusty Grasswren), the gorgeous Rufous-crowned Emu-wren, Spinifex Pigeon, the extremely localized Hall’s Babbler, the unobtrusive and intricately-patterned Chestnut-breasted Quail-thrush, the stunning Painted Finch, rare and nomadic Black Honeyeater, Red-browed Pardalote, and if we are extremely fortunate, the very rare and elusive Grey Falcon and the crepuscular Bourke’s Parrot that are both regular in this area.

Other more widespread and regular species we can also expect today include Yellow-throated Miner, the tiny Mistletoebird, the large and impressive Spiny-cheeked Honeyeater, and depending on conditions and the amount of standing water in the reserve’s seasonal pans, possibly Black-tailed Native Hen and Pink-eared Duck.

**Day 13: Winton to Charters Towers.** Today will essentially be a travel day as we begin the journey back towards Cairns. We will make several birding stops along the way in search of any species we may not have encountered thus far.

We can expect to arrive at Charters Towers in the late afternoon where we’ll settle into our accommodation for an overnight stay.

**Day 14: Charters Towers to Cairns.** Today we continue the long drive back to Cairns, stopping en route for any species we still need or of which we require better views and these could include rarities like Black-breasted Buzzard, Square-tailed Kite, Black Falcon and Ground Cuckooshrike.

Tonight, we can enjoy a delicious farewell dinner as we reminisce over all the amazing birds that we’ve encountered over the past two weeks and all the unforgettable moments and experiences to which we’ve been treated.

**Day 15: Cairns and depart.** This morning this epic Queensland Outback birding adventure concludes after breakfast with transfers to Cairns International Airport to connect with our onward flights home. Those continuing on the Cape York Peninsula Extension will begin the tour with some initial birding around Cairns.
Cape York Peninsula Extension

Our tour extension to the Cape York Peninsula focuses on the vast lowland rainforests of Iron Range National Park and surrounds, while also targeting the Atherton Tableland endemics and the arid woodlands of Lakefield National Park.

Cape York harbours a suite of more typical New Guinea species such as the impressive Palm Cockatoo, Red-cheeked and Eclectus Parrots, White-faced Robin, Yellow-billed Kingfisher and Magnificent Riflebird, as well as several species unique to the Peninsula like White-streaked Honeyeater, Northern Scrub Robin and Frill-necked Monarch. We also target the incredibly beautiful and localised Golden-shouldered Parrot, while on the Tablelands around Julatten, we’ll be aiming to find the gorgeous Golden and Tooth-billed Bowerbirds, the bizarre Chowchilla, the unique Fernwren, Spotted Catbird, Noisy Pitta, Bower’s Shrikethrush and Grey-headed Robin amongst others.
Day 1: Arrival in Cairns. Today is set aside as an arrival day for those not participating in the Queensland Outback tour. We will meet for a welcome dinner this evening and you are welcome to arrive anytime today.

Day 2: Cairns to Julatten. The Cairns area is indeed a birding mecca with the wealth of tropical habitats here supporting one of the richest assemblages of birds and wildlife in Australia.

This morning we’ll begin our explorations of the bird-rich Cairns area with a morning visit to the Cairns Botanical Gardens. Here, the adjoining wetlands and conservation areas, offers a fine mix of water and bush birds. Australian Brush Turkey, Orange-footed Scrubfowl, Superb and Wompoo Fruit Doves, Double-eyed Fig Parrot, Australasian Figbird, Black Butcherbird, Green Oriole, the stunning Noisy Pitta and Lovely Fairywren may all be seen here as might Spectacled Flying Fox. In the wetland habitats we’ll search for the handsome Comb-crested Jacana, Raja Shelduck, Green Pygmy Geese, White-browed Crake and the stunning Crimson Finch. Nearby mangrove habitat is home to Mangrove Robin, Shining Flycatchers and the odd-looking Beach Stone-Curlew.

After a fantastic morning’s birding we will depart the Cairns area and begin the drive up into the Atherton Tablelands, where we’ll arrive at the small town of Julatten in the late afternoon for a two-night stay.

Day 3: Julatten area. We’ll spend a full day birding the lush forests, woodlands and edge-habitat in the scenic and endemic-rich Julatten area for a number of highly localized and prized birds.

In the moist, mid-altitude forests we’ll be searching for the unbelievable Golden Bowerbird, the more readily-seen Tooth-billed Bowerbird, the noisy and bizarre Chowchilla, Bridled Honeyeater, Mountain Thornbill, the unique Fernwren, Bower’s Shrikethrush, the attractive and fairly confiding Grey-headed Robin, Atherton Scrubwren, the rare and localised Blue-faced Parrotfinch, the superb Noisy Pitta, Wompoo Fruit Dove, Spotted Catbird, Yellow-breasted Boatbill, Yellow-spotted, Macleay’s and Graceful Honeyeaters, the localised, North Queensland cuneate race of Chowchilla (female) by Glen Valentine

Grey-headed Robin by Dennis Braddy

Chowchilla (female) by Glen Valentine
Day 3: Julatten to Musgrave.

This evening we can search for Papuan Frogmouth and Southern Boobook near our accommodations.

**Day 4: Julatten to Musgrave.** This morning, if time permits, we will make our way up the famous Mt Lewis Road and search for any of the high-altitude Atherton Tableland rainforest specialties that we may still be needing such as Golden and Tooth-billed Bowerbirds, Chowchilla, Fernwren and Atherton Scrubwren.

Thereafter we’ll continue the drive north towards the town of Musgrave, situated within Cape York’s dry woodland habitat and the home of the magnificent Golden-shouldered Parrot.

We’ll arrive at our accommodations in Julatten in the early evening and settle in for a two-night stay.

**Day 5: Musgrave area and Lakefield National Park.** One of the main target species today will be the beautiful and extremely localized Golden-shouldered Parrot that occurs in the dry woodlands on the Cape York Peninsula. Our strategy to see this scarce and highly sought-after endemic is to meet up with a local cattle station owner who should be able to connect us with a number of these incredibly beautiful birds on her property.

After hopefully obtaining excellent views of one of Australia’s most beautiful and range-restricted parrots, we’ll continue birding the arid woodlands that dominate this wonderful and bird-rich region.

Notable species we hope to encounter in the wonderful Lakefield National Park and surrounds include Black-backed and Pied Butcherbirds, the impressive Pheasant Coucal, family groups of Grey-crowned Bassian Thrush, Spangled Drongo and Little Shrikethrush. In the moist woodland areas and forest edge we may encounter Pacific Emerald Dove, the shy and elusive Red-necked Crake and Pale-vented Bush-hen, Brown and Dusky Honeyeaters, Leaden Flycatcher, Yellow Oriole, Little Bronze Cuckoo, White-cheeked Honeyeater, Common Cicadabird and the delicate and lovely Red-browed Finch.

We even stand a realistic chance of seeing the unique and bizarre Duck-billed Platypus in this area,

This evening we can search for Papuan Frogmouth and Southern Boobook near our accommodations.
Common and widespread Australasian species we are also likely to see today include Australian Magpie, Willie Wagtail, Torresian Crow, Magpie-lark, Lemon-bellied Flyrobin, Horsfield’s Bushlark, Golden-headed Cisticola, Olive-backed Sunbird and Australian Pipit, while raptors are also well represented here and we are likely to find Whistling and Brahminy Kites, White-bellied Sea Eagle, the regal Wedge-tailed Eagle and Nankeen Kestrel. If we are extremely fortunate we may even encounter one or two of the area’s very rare and seldom-seen raptors such as the extremely elusive Red Goshawk, Black-breasted Buzzard or Black Falcon.

Wetlands in the area may harbour Australasian Grebe, Australasian Darter, Little Pied and Little Black Cormorants, White-necked, White-faced and Pied Herons, Eastern Great, Intermediate and Eastern Cattle Egrets, Nankeen Night Heron, Glossy, Australian White and Straw-necked Ibises, Royal Spoonbill, Black-necked Stork, the large, impressive and monotypic Magpie Goose, Plumed and Wandering Whistling Ducks, Raja Shelduck, Green Pygmy Goose, Grey Teal, Pacific Black Duck, Hardhead, Brolga, Australian Pratincole, White-headed Stilt, Black-fronted Dotterel, Masked Lapwing and Comb-crested Jacana, depending on conditions at the time of our visit. This is also a good area to see the stately Australian Bustard striding across the grassy savannah.

Mammal possibilities include Antilopine Wallaroo, Agile Wallaby, and if we are really fortunate, the Cape York Rock Wallaby.

**Day 6: Musgrave to Lockhart River, Cape York Peninsula.** This morning we can enjoy some final birding towards Lakefield National Park, searching for any birds we might be missing, such as the very rare Red Babblers, Black-faced and Little Woodswallows, Silver-crowned and Little Friarbirds, the diminutive but extremely attractive Masked, Double-barred and Black-throated Finches, the aptly-named Great Bowerbird, Diamond Dove, the boldly-patterned Squatter Pigeon, Bar-breasted, Banded, Rufous-throated, Rufous-banded, White-gaped, Yellow, Blue-faced and Yellow-tinted Honeyeaters, Red-browed and Striated Pardalotes, the nuthatch-like Varied Sitella, Common Bronzewing, Bar-shouldered Dove, Red-tailed Black Cockatoo, Red-winged Parrot, Pale-headed Rosella, Laughing and Blue-winged Kookaburras, Forest Kingfisher, Oriental Dollarbird, Red-backed Fairy-wren, the tiny Weebill, Grey Shrike-thrush and Australasian Figbird.
Goshawk or perhaps one of the rarer finches or honeyeaters, before continuing our journey north towards Lockhart River, situated near the extreme tip of the Cape York Peninsula and the gateway to the fabulous rainforest reserve of the Iron Range.

We should arrive in the late afternoon with time to settle in and enjoy the sounds and sounds of this wonderful birding and wildlife region where we’ll be spending the next four nights.

**Days 7 to 9: Lockhart River, Iron Range National Park.** Iron Range National Park harbours the most extensive example of lowland tropical rainforest remaining in Australia, and its avifauna is indicative of a time when Australia and New Guinea were connected during the last Ice Age. We will spend the next three full days exploring this amazing area. The Cape York Peninsula supports several species that are endemic to this extreme tip of north-eastern Australia, as well as a number of species that otherwise only occur on the island of New Guinea, a stone’s throw-away to the north.

Fabulous species that overlap with New Guinea but are restricted to this tiny corner of Australia include the magnificent Palm Cockatoo, the outrageously vivid Eclectus and Red-cheeked Parrots, Chestnut-breasted Cuckoo, the wonderful Yellow-billed Kingfisher, Green-backed and Tawny-breasted Honeyeaters, the beautiful but unobtrusive White-faced Robin, the scarce Yellow-legged Flyrobin, Trumpet Manucode, Fawn-breasted Bowerbird, the very shy Black-eared Catbird (recently split from Spotted Catbird) and the incredible Magnificent Riflebird. Australian endemics that are restricted to this awesome part of the world are: White-streaked Honeyeater, the shy Northern Scrub Robin (recently split from Papuan Scrub Robin as an Australian endemic) and the exquisite Frilled-necked Monarch. The tiny and indistinct Tropical Scrubwren will be another major target here, as although this species does occur in New Guinea, it generally occurs out of the range of most tours that visit the island.

We will be on the search for all of these specialties, as well as a number of other range-restricted and sought-after species during our time in the area and these include the incredible Southern Cassowary, Double-eyed Fig Parrot (represented here by the distinctive marshalli race), White-eared and Spectacled Monarchs, White-browed Robin, the gaudy Rose-crowned, Superb and Wompoo Fruit Doves, brilliant-blue Forest Kingfisher, the dazzling Azure Kingfisher, the uncommon Grey Goshawk, the small, didimus race of Brown Goshawk, Pacific Baza, Collared Sparrowhawk, Australian Brushturkey, Orange-footed...

Scanning across the area’s fresh-water and coastal wetlands and mudflats may turn up a flock of the rare, shy and unobtrusive Spotted Whistling Duck, Pacific Reef Heron, Pied and Striated Herons, Pied Oystercatcher and the low-density Beach Stone-curlew, while Sooty, Bridled and Black-naped Terns, Common Noddy and Great and Lesser Frigatebirds might entertain us offshore.

Stands of coastal mangroves may yield the hyper-active Red-headed Myzomela (Honeyeater), the musical Large-billed Gerygone, the furtive Mangrove Robin, Varied Honeyeater, the tiny, blue-and-white Little Kingfisher and the larger Torresian Kingfisher (split from the widespread Collared Kingfisher).

A night drive may reveal Marbled and Papuan Frogmouths, the rare Rufous Owl, seldom-encountered Australian Masked Owl and Large-tailed and Spotted Nightjars.

The lush forests of the Iron Range also support a number of great mammals and we may be fortunate and find some of these that could include Common Spotted Cuscus, Striped Possum, Northern Quoll, Red-cheeked Dunnart, Rufous Spiny Bandicoot, Red-legged Pademelon and Cape York Melomys. We may even be lucky enough to see some of the tube-nosed and blossom-feeding bats around Portland Roads, as well as flying foxes of various species. Some encampments of Little Red and Black Flying Fox can number literally in the millions!

Day 10: Lockhart River, fly to Cairns and depart. After an incredible three-days birding and wildlife-spotting around Lockhart and the Iron Range National Park, we’ll depart this amazing and wildlife-rich region by means of an internal flight back to Cairns where this epic birding adventure of extreme north-eastern Australia concludes.
FINANCIAL ARRANGEMENTS:
Tour dates, prices, single supplement rates, approximate flight costs and spaces available for this tour are displayed on our website. Please see under IMPORTANT NOTES below.

This includes:
- All meals from dinner on day 1 to breakfast on day 15 for those on the main Queensland Outback tour & from dinner on day 1 to breakfast on day 10 for those on the Cape York Extension;
- All lodgings as per the itinerary;
- All ground transportation;
- Reserve entrance fees;
- All activities as mentioned in the itinerary; and
- All guiding services (including tips for local guides and services).

The tour fee does not include:
- Visa fees;
- ANY flights (see above);
- Any drinks;
- Transfers;
- Special gratuities; and
- Telephone calls, laundry and other items of a personal nature.

Single Supplement: The single supplement cost for this tour will be charged if you wish to have single accommodation. If RBL cannot provide you with a rooming partner for these nights although you choose to share, the single supplement will become applicable. We will make all reasonable efforts to ensure that a rooming partner is found if you do wish to share.

IMPORTANT NOTES:
a) Due to constantly fluctuating exchange rates, we quote our tours in 4 currencies. The tour price is however fixed only in the currency printed in bold, and the actual cost in the other currencies listed will be adjusted according to prevailing exchange rates at the time of final invoicing (usually 4 months before the tour.) The same applies to approximate flight and single supplement rates, which are also quoted in the respective fixed currency.
b) Rates are based upon group tariffs; if the tour does not have sufficient registration a small party supplement will have to be charged.
c) Furthermore, these costs are subject to unforeseen increases in tour related costs and may have to be adjusted as a result.
d) Lastly, we may be forced to change or alter the itinerary and / or the designated Rockjumper leader at short or no notice due to unforeseen circumstances; please be aware that we will attempt to adhere as close to the original program as possible.

Tipping: As noted above, gratuities (drivers, hotel staff, restaurants etc.) are included on this tour. However, this does not include your Rockjumper leader. If, therefore, you feel that he has given you excellent service, it is entirely appropriate to tip him.

Special Notes:
- It is important for the comfort of your fellow travellers that you do not over-pack. Kindly stick to 20kg (44lb) for check in luggage and 8kg (+/-18lb) for hand luggage.
- Temperatures in northern Australia can reach as high as 35˚C (98˚F), even in the middle of winter and nights can be cold in the dessert regions.
• The Queensland Outback tour involves a lot of driving and time in the vehicles to reach all the necessary birding sites. Several of the roads are rough and in poor condition and therefore require 4x4 vehicles. 4x4 vehicles are also required on the Cape York Extension due to the poor condition of the roads and the remote nature of the region.

ARRIVAL AND DEPARTURE DETAILS:
This tour does not include ANY airfares. The Queensland Outback tour will commence at our Cairns hotel with a welcome dinner on day 1 and will end at Cairns Airport after breakfast on the morning of day 15.

The Cape York Extension will commence at our Cairns hotel with a welcome dinner on day 1 and will conclude at Cairns Airport in the mid to late morning (depending on our flight time from Lockhart River to Cairns) on day 10.

The above information in respect of arrivals and departures is a guide only. Precise arrival and departure information will be sent to you in your Tour Confirmation package once the tour has been officially confirmed. If you wish to arrive early and/or depart late and would like assistance in this regard, kindly contact the Rockjumper office.

FLIGHTS:
Sydney International Airport, Sydney (IATA: SYD) is the main port of entry for international flights in Australia, and is well serviced by all of the world’s major airlines. Regular flights linking Australia’s major cities are also available. Please DO NOT book any flights until you have consulted the Rockjumper office for confirmation on the status of the tour.
